Project Title : Muskaan – A Food Waste Management Application.
Domain (Area of Project) : Application Development

Name of Project Guide : Prof. Ichhanshu Jaiswal (ichhanshu.jaiswal@vit.edu.in)
Name of Students : Zeel Mehta (zeel.mehta@vit.edu.in)
Darshan Gawade (darshan.gawade@vit.edu.in)
Ketan Patil (ketan.patil1@vit.edu.in)

Brief idea of Project :

Muskaan is a food waste management application, where user can donate excessive good quality food, Restaurants can sell excessive food at low cost, NGOs and receivers can receive the food with single click. Muskaan overcomes all issues present in other similar applications and provides more features which include. end to end food donation and receive cycle, User feedbacks and ratings, user upgradation to NGO and restaurants, Muskaan mingle to share donations or achievements and inspire other users to donate food, karma zone where donor can invest karma points and win vouchers and karma board to show top karma point holders.

Screenshots of the Project / Photos of Working Model (Min.3):

Applications:

1. Prevention of food waste in the form of donations.
2. Aid to NGOs for food donation drives.
3. Profit for restaurants and hotels for excess food.
4. User engagement with vouchers and Muskaan mingle (Social media)
